General comments:

Good Job. Next time you can try to change the data to test if your code is correct.

Penalty feedback:

Incorrect folder organisation and template

Questions feedback:

Question 4: Incomplete explanation of what are the differences between types.

Conventions issues:The names of some functions are not in the

Coding issues:

The system failed to return the best module for different inputs. For example, changing the last mark of the last student record from 10 to 0 (Rachel, 1009, ECM0002 2020/2) should have resulted in ECM1406 2020/1 AverageGrade = 8.33 as the best module.
